

Sort (Re-order) Threats

Elements can be moved or copied from one position/level in the hierarchy to another by drag/dropping to the desired position in the hierarchy.

In Tree View, you can move or copy a node from one position to another by dragging and dropping. Simply select a node and hold on to the left button of your mouse and then drag to the position you want the node to be moved/copied (you will see a blue arrow as a pointer). Once you release the mouse's left key, you will then see a dialog asking whether to copy or move the node. Select and click OK to confirm.

Tree View Expand All Collapse All Auto-Redraw + Add Edit

- Threats
 - Human Factor
 - Inadequately Trained Staff
 - Disregarding or Not Following Proper Policies, Processes, or Procedures
 - Lack of Situational Awareness
 - Engineers Failure to Properly Install Equipment
 - Environmental
 - Flooding of Intelligent Event Monitoring Infrastructure
 - Lightning Striking Signaling Infrastructure
 - Infrastructure
 - Minor Electrical Power Shortage
 - Major Electrical Power Loss
 - Mechanical Failure of Sensors
 - Mechanical Failure of Signals
 - Mechanical Failure of Cables
 - Terrorism
 - Conventional Attack on the Signalling Infrastructure
 - Cyber Attack on the Intelligent Event Monitoring Network Itself
 - Cyber Attach on the Telephony and Broadband Infrastructure of the Service Provider
 - Technology
 - System Software Technology Obsolescence
 - System Hardware Technology Obsolescence
 - New Cutting Edge Software Technology Available
 - Intelligent Monitoring System Software Failure

You can also **sort** elements in the cluster below the **selected** threat or sub-threat by name ascending/descending:

Sort

- By Name Ascending
- By Name Descending

Sorting by name can be done both in Tree View and Hierarchy View.

HINT: You can use the **Model Snapshots** feature in case you want to revert to what you had before the sorting.
