

Likelihood: Information Documents

You can define Likelihood's Information Documents in the **LIKELIHOOD OF EVENTS > STRUCTURE > Information Documents** page.

This screen allows you to create and/or edit information documents for:

- The Threats (top node)
- Threats
- Sub-threats
- Covering Threats
- And Events Given Covering Threats

Select Columns		Threats																	
		Human Factor				Enviro		Infrastructure				Terrorism		Technology					
Events		Inadequately	Disregarding	Lack of Situational	Engineers Fa	Flooding of In	Lightning Stri	Minor Electric	Major Electric	Mechanical F	Mechanical F	Mechanical F	Conventional	Cyber Attack	Cyber Attack	System Softw	System Hard	New Cutting t	Intelligent Mo
[01] Late Train Running																			
[02] Degradation of Intelligent Monitoring System Physical Assets																			
[05] Line Closure																			
[06] Failed Integration with Future Monitoring System Network																			
[07] Intelligent Event Monitoring Network Shut Down																			
[08] Major Train Work Accident																			
[09] Minor Train Work Accident																			
[10] Major Train Public Accident																			

Clicking any Edit Information Document button will open the [Rich text editor](#), where the Project Manager can add/edit the **information document** -- which may consist of texts, rich texts, and images.

The blue information document icon  pertains that it has content, while gray  pertains it is empty.

When there is no information document icon in a given cell, it means that the threat is not contributing to the event (or the event is not vulnerable to the threat)

NOTE: Due to security reasons, only images are allowed to be attached to the information documents. You can add hyperlinks to link to any external files. Just upload your PDF (or any other file) to any external servers such as Dropbox, GoogleDrive, OneDrive, Amazon, etc., and put the link to this file in the information documents.
