

Impact: 2D Analysis

Overview

The Two Dimensional sensitivity for Impact shows how well the events perform given any two objectives.

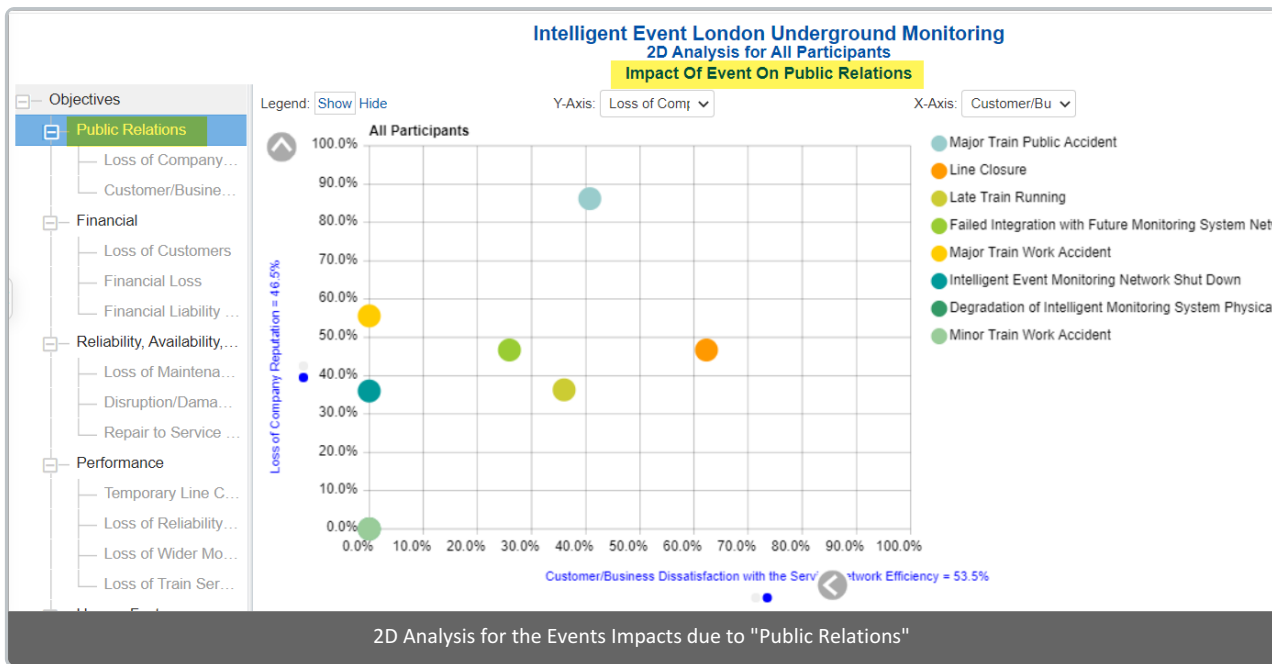

One objective is represented on the X-Axis and another on the Y-Axis. The circles represent the events.

You can change the objectives being displayed on the x and y axes by selecting them in the pull-down menus:

Y-Axis: Public Relatic ▼ X-Axis: Financial ▼

or by clicking the   (x-axis), or   (y-axis)

By selecting an element in the hierarchy other than the top node, you can see the results due to this element rather than the overall results due to the "Objectives" node.

You can show the local and global objective's impacts on the Objectives Hierarchy at the right using the Local-Global buttons:
