

# Basic Troubleshooting Techniques

Having trouble with Riskion? Here are common troubleshooting techniques that often help.

## 1. Try a hard refresh.

Browsers store cached versions of web pages to speed up your experience. However, sometimes this causes you to view an older version of a site or application. If the site looks weird or has glitched, doing a hard refresh often can fix the problem.

1. Windows: Control + F5
2. Apple/Mac: Command + R or Apple + R
3. Linux: F5

## 2. Log out and log back in.

The software equivalent of turning it off and on, this is probably the most common troubleshooting technique there is. It's common because it works a lot of the time. Not successful? Try totally logging out and totally closing your browser. If you happen to leave your browser open for long periods of time, it can become very slow and cause performance issues with many sites and applications.

## 3. Clear your cache and cookies.

Your browser stores a lot of information about your web history in cookies and cache. Over time, this can slow down your browser and, with certain sites or applications, can cause conflicts with newer versions. Sometimes it might be helpful to clear your cache and cookies to improve browser and application performance.

1. Chrome: <https://support.google.com/accounts/answer/32050>
2. Firefox Cache: <https://support.mozilla.org/en-US/kb/how-clear-firefox-cache>
3. Firefox Cookies: <https://support.mozilla.org/en-US/kb/delete-cookies-remove-info-websites-stored>
4. Internet Explorer: <http://windows.microsoft.com/en-us/internet-explorer/manage-delete-browsing-history-internet-explorer>
5. Safari Cookies: <https://support.apple.com/kb/PH19215>
6. Safari Cache: <https://support.apple.com/kb/PH19215>

## 4. Try a different browser.

Some issues may be browser specific or caused by an extension or plugin. Trying a different browser can help you narrow down what is causing a problem.
