Event Consequences to Objectives
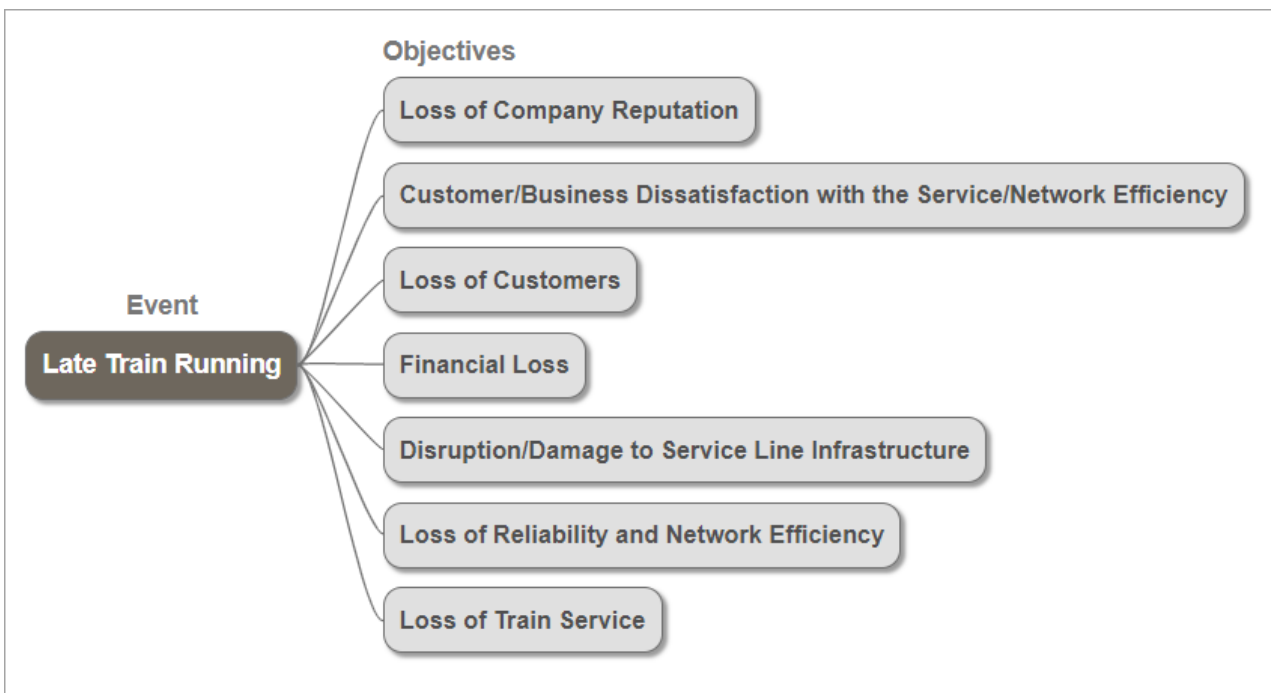

The Event Consequences to Objectives page allows you to define the contributions (Consequences Grid) in a mindmap or chart format.

You can select the event by clicking on the events list:

The connected objective nodes to the event node are the objectives the event is consequential (or has an impact on):

You can add a new event by clicking [+ New Event]

A modal will pop out where you will enter the event names -- one event per line.

Add Events

ⓘ Add new events here (press carriage return to add second and third):

Event1
Event2

✔ OK   🚫 Cancel
